SUMMARY

Backend developer with about 3 years of professional experience in contract roles on banking and real-estate systems, plus 2 years of part-time startup work while studying. Currently building NestJS and Express backends plus Next.js frontends for a real-estate company: an internal real-time chat platform and an AI roleplay app for sales training. Before that, placed at Bank Mega for two years on its Branch Delivery System: an SSO portal and a new loan-transaction web app. Seeking remote work from UTC+7; fluent written English and comfortable with async work: written updates, clear tickets, documented decisions; can overlap up to 4 hours with EU or US hours.

SKILLS

Languages: TypeScript, JavaScript, PHP

Backend: Node.js, NestJS, Express, REST API, WebSockets, Laravel

Databases & ORM: PostgreSQL, MySQL, MongoDB, Redis, Prisma

Frontend: Next.js, React, Tailwind CSS

Cloud & realtime: Google Cloud, Docker, Centrifugo, Firebase Cloud Messaging

Testing & tools: Vitest, Selenium, Postman, Git

AI: OpenAI API

EXPERIENCE

Backend Developer – Brighton Real Estate

Surabaya, Indonesia · Contract · Jan 2026 – Present

Full-stack in practice: backend plus Next.js frontends

- Designed and built the backend of an internal real-time chat platform end to end (NestJS, TypeScript, Prisma, PostgreSQL, Redis), with realtime messaging (Centrifugo) and push notifications (FCM) on Google Cloud.
- Chat platform API: about 200 REST endpoints (218 route handlers) across 29 NestJS modules and 39 database models; covered by 270+ automated test files (Vitest unit and end-to-end).
- Implemented production concerns in the chat API: a minimum-app-version guard that returns HTTP 426 to force mobile updates, server-side image resizing in a background job (sharp), idempotent message sending, and rate limiting.
- Primary developer of the chat API (about 97% of commits); built the Next.js admin console (19 pages) on top of the same API.
- Built an AI-powered roleplay app for sales training: Express + TypeScript backend with the OpenAI API and WebSockets, Next.js 15 frontend (32 pages), about 60 API routes.
- Main contributor to both backend and frontend (about 85% of backend commits, 78% of frontend commits).
- Enhancements and maintenance across other internal Node.js/Express services on request.

Career break (Nov 2025 – Dec 2025) between contracts

JavaScript Developer – Xsis Mitra Utama / IBM (client: Bank Mega)

Jakarta, Indonesia · Contract · Oct 2023 – Oct 2025

Outsourced developer placed at Bank Mega for two years: hired via Xsis Mitra Utama, contract continued under IBM after IBM acquired Xsis.

- One of two developers on the bank's SSO portal for its Branch Delivery System (one login to access other internal apps), built with React, Node.js and MySQL.
- One of two developers on a new loan-transaction web app that consolidated features previously spread across several internal systems, built with Next.js and PostgreSQL.
- Solo-built a Next.js proof of concept for revamping the customer-service app (MySQL), about 50% built to pitch the full revamp; the bank then paused the project.
- Stack across projects: React, Next.js, Node.js, MySQL, PostgreSQL.

EARLIER EXPERIENCE

Internship Trainee (Full-Stack JavaScript) – Xsis Academy · Jakarta, Indonesia · Aug 2023 – Oct 2023

Full-stack JavaScript training: Node.js/Express backend, React frontend, PostgreSQL, REST API testing with Postman, team project on GitLab.

Student Project Lead – Museakademi (lecturer-led university project) · Malang, Indonesia · Jan 2023 – Jun 2023

Led a lecturer-led university project revamping the Museakademi website with the PERN stack (PostgreSQL, Express, React, Node.js); handled backend API development and system testing.

QA Intern – PT Arkatama Multi Solusindo · Malang, Indonesia · Aug 2022 – Dec 2022

Tested websites and mobile apps (including Selenium), documented bugs, and prepared UAT documents and user guides for clients.

Web Developer (part-time) – Clev.com · Malang, Indonesia · Oct 2020 – Aug 2022

Programmer & Public Relations (part-time) – Softcru.com · Malang, Indonesia · Oct 2020 – Feb 2022

Student-era startups building an Upwork-like marketplace connecting clients with developers and software houses; worked as web developer and also in public relations.

EDUCATION

S.T. (Bachelor of Engineering), Informatics Engineering – Universitas Negeri Malang (State University of Malang) · 2019 – 2023

Bootcamp, Full-Stack Web JavaScript – SYNRGY Academy · Sep 2022 – Jan 2023

LANGUAGES

English – fluent (written), conversational (spoken)
